RautRushi570 raut_rushikesh rautrushirksk

Aspiring Software Engineer with strong foundations in **Java, SQL, Python, Object-Oriented Programming, Data Structures & Algorithms, and Database Management Systems**. Experienced in developing academic projects involving data analysis and software development concepts. Familiar with Git, Agile methodologies, relational databases, and Generative AI tools. Passionate about building reliable software solutions, learning modern technologies.

EDUCATION

Pimpri Chinchwad College of Engineering, Pune 2022 – 2026
B.Tech - Information Technology *Pune, Maharashtra*
Anantrao Deshmukh Junior College, Murtizapur 2020 – 2022
Higher Secondary Education *Akola, Maharashtra*
Late Parmanand Malani School, Murtizapur 2007 – 2020
School Education *Akola, Maharashtra*

TECHNICAL SKILLS

- **Programming Languages:** Java, SQL, Python, JavaScript
- **Software Engineering:** Object-Oriented Programming (OOP), Data Structures & Algorithms, SDLC, Agile Methodology
- **Database Technologies:** MySQL, SQL Queries, Relational Database Concepts, DBMS
- **Web Technologies:** HTML5, CSS3, Bootstrap, Tailwind CSS
- **Tools & Platforms:** Git, GitHub, Linux, Ubuntu, Windows
- **Core Subjects:** Operating Systems, Computer Networks, Database Management Systems
- **Other Technologies:** Machine Learning, Generative AI Tools (ChatGPT, GitHub Copilot)

PROJECTS

Diabetes Prediction System — Python, Scikit-learn, Pandas
- Developed a predictive analytics application using Python and machine learning techniques on the PIMA Diabetes Dataset.
- Performed data preprocessing, validation, feature engineering, and model evaluation achieving **78% accuracy**.
- Applied debugging, analytical problem-solving, and documentation practices throughout the development lifecycle.

House Price Prediction System — Python, Pandas, CatBoost
- Built a predictive model for housing price estimation using CatBoost and Linear Regression algorithms.
- Conducted comparative analysis resulting in approximately **15% improvement in prediction accuracy**.
- Performed data validation, feature analysis, model evaluation, and technical documentation of findings.

TECHNICAL ACHIEVEMENTS

- Solved **100+ Data Structures and Algorithms problems** across LeetCode and GeeksforGeeks platforms.
- Actively utilize Generative AI tools such as ChatGPT and GitHub Copilot for learning and debugging.
- Demonstrated proficiency in SQL, Java, and problem-solving through academic projects and technical certifications.

CERTIFICATIONS

- Postman API Fundamentals Student Expert – Postman
- SQL Intermediate Certificate – HackerRank
- Java Basics Certificate – HackerRank

ACHIEVEMENTS

- Runners-up in Treasure Hunt Competition at Spectrum 2023.
- Secured 2nd Place in Escape the Room event during Technical Fest.
- Consistently strengthened analytical and problem-solving skills through competitive programming and technical learning initiatives.
